

Mr. Tony Cerminaro

Chief of Advanced Concepts and Architectures in the Platform Systems and Propulsion Division, Air Warfare Directorate, Air Force Research Laboratory

Mr. Tony Cerminaro is the Chief of Advanced Concepts and Architectures in the Platform Systems and Propulsion Division, Air Warfare Directorate, Air Force Research Laboratory, Wright-Patterson Air Force Base. Leveraging more than three decades of defense acquisition experience, he directs joint-requirements definition, Multidisciplinary Design, Analysis, and Optimization, and systems engineering initiatives to accelerate the transition of next-generation propulsion, power, and thermal technologies to the field. His diverse career spans flight test operations, academia, program management, and systems engineering across several Air Force aircraft and weapon systems.
